REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

As a below named inventor, I hereby declare that:

My residence, mailing address and citizenship are stated below next to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is described and claimed

in patent number 6,344,033, granted February 5, 2002, and for which a
reissue patent is sought on the invention entitled NEEDLELESS CONNECTOR

the specification of which

☒ is attached hereto.☐ was filed on _____ as reissue application number _____ / _____
and was amended on _____
(If applicable)I have reviewed and understand the contents of the above identified specification, including the claims,
as amended by any amendment referred to above.I acknowledge the duty to disclose information which is material to patentability as defined in
37 CFR 1.56.I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described
below. (Check all boxes that apply.)☐ by reason of a defective specification or drawing.☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.☐ by reason of other errors.At least one error upon which reissue is based is described below. If the reissue is a broadening
reissue, such must be stated with an explanation as to the nature of the broadening:

This is an application for a broadening reissue application. Pursuant to the broadening reissue, Claims 15-54 have been added. Claims 15-54 are submitted because patentee claimed less than he had the right to claim in the patent. For example, Claim 15 is broader than Claim 1 in that it does not require the following limitation:

"said housing including a first upper edge portion having an outside surface of generally constant first diameter, and a second lower portion spaced from said upper edge portion and having an outside surface of a generally constant second diameter, said second diameter being larger than said first diameter, said housing including a third intermediate portion extending from said distal edge portion to said second portion, said third portion having an outside surface with a changing diameter;"
